

Classic Protection Pack

For those who want to maximise re-sale

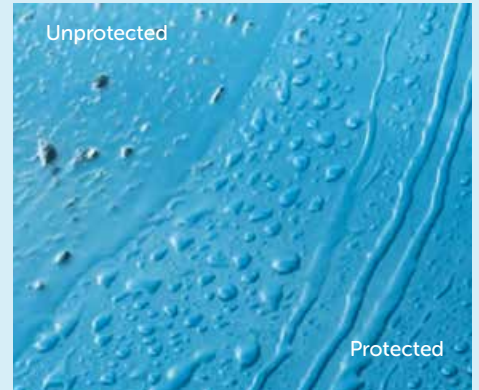

HYDRO ACTIV

Exterior Surface Coating

A high performing formula combining Silicon Carbide (SiC) and Silicon Dioxide (SiO₂), delivering extreme durability, hardness and a permanent super gloss finish.

- Mirror-finish super gloss: The Silicon Carbide (SiC) base gives the highest gloss and hydrophobic properties to help repel anything that gets thrown at it
- Durability tested to last a lifetime*: As the most durable protective product on the market, HYDRO is 4 times harder than quartz based protectors
- Proven and globally certified: Tested, proven and globally certified to the stringent standards set out for Boeing compatible products.

Interior Surface Coating

- Leather Preserver - Protects against the effects of UV rays such as cracking, splitting and discolouration
- Vinyl Conditioner - Provides protection against cracking and discolouration caused by the harmful effects of UV rays
- Fabric and Carpet Protection - Provides a resilient and effective stain barrier against commonly consumed food and drink spills, creating an easy-to-clean surface

HYDRO ACTIV Surface Coatings are a once-off application for a lifetime* of protection. This means you can spend less time cleaning your vehicle and more time doing the things you love.

Truseal Tyre, Wheel & Glass Protection

Reduce adhesion of brake dust and increase visibility on your windscreen with this three part application process. Truseal offers corrosion resistance and easy to clean alloy wheels, a long lasting satin tyre finish and a highly durable protective layer between glass and the elements.

Product applied by trained technicians.

*Warranty terms, conditions and exclusions apply.
